the graphics are not amazing it is still (in my opinion) beautifully and even if you don't agree it is hugely made up for by the game play. although it can be a little repetitive / predictable at times (but so are all other games) there is essentially 2 long enjoyable campaigns in a huge world with some fun side missions and a huge ship customising system with loads of different weapon types and ships. by today's standards there is still allot of variety. by the standard's of the day it was released it was phenomenal.. This is less-complicated than standard Andiod game... Not recommended!. What makes a fun game even better? Making the soundtrack free while other games are charging like 20 bucks for theirs

Thank you Running with scissors :D. About as good as eating a handfull of nails..... An Absolute Gem of a game. many hours sunk in and it's easy and very enjoyable.. the only thing that is extreme here is the feeling of boredom!

One of the most disappointing games I've ever played. pew pew pew. I\u2019m Sonic. Sonic the Hedgehog.. Do you like waiting? well buy it... just tutorial+ first map on easy... is about 23min... what an excelent job!! graphick horible,weapons are bad too... and the AI logick... uh i want cry... bettr go buy some bettr game for this price.(btw you cant skip waiting time... you need wait 1min all the time... there is not ready button like in dungeon or any other TD games...) well this game maybe can be good... but... buy it for 5€ or less... my reccomend.... This HOG is very well done with a few plot twists but it's also short and easy if you're an expert player. It's a bit overpriced considering everything so I'd recommend buying it on sale.. The Dark Souls of third-person forklift simulators.
